Dryinidae (Hymenoptera Chrysidoidea): an interesting group among the natural enemies of the Auchenorrhyncha (Hemiptera).

A. GUGLIELMINO

Abstract

A survey on the family Dryinidae (Hymenoptera Chrysidoidea), an interesting group of natural enemies of the Auchenorrhyncha (Hemiptera), is emphasized. In particular, informations on evolution, biology, natural enemies, economic importance, Auchenorrhyncha-Dryinidae relationships and biological control of this group on Auchenorrhyncha taxa are provided.
