VOLUME 9

 **WILEY-BLACKWELL**

A John Wiley & Sons, Ltd., Publication

Contents

List of Contributors	ix		
Series Preface	xiii		
Volume Preface	xix		
List of Abbreviations and Acronyms	xxi		
1 Poplars	1		
<i>Chandrashekhar P. Joshi, Amy Brunner, Victor Busov, Richard Meilan, Shivegowda Thammannagowda and Chung-Jui Tsai</i>			
1. Introduction	1		
2. Poplar Transformation	8		
3. Future Road Map	24		
Acknowledgments	25		
References	26		
2 Eucalyptus	35		
<i>Carlos Alberto Labate, Teotônio Francisco de Assis, Shinitiro Oda, Eduardo José de Mello, Edson Seizo Mori, Mario Luiz Teixeira de Moraes, Luis Pedro Barrueto Cid, Esteban Roberto González, Acelino Couto Alfenas, Edival A. Valverde Zauza, Celso Foelkel, David H. Moon, Mayra Costa da Cruz Gallo de Carvalho, Danielle Gregorio Gomes Caldas, Raphael Tozelli Carneiro, Alexander de Andrade and Guilherme Rafael Salvatierra</i>			
1. Introduction	35		
2. Development of Transgenic Eucalypts	57		
3. Important Areas for Improvement Using Genetic Transformation	65		
References	99		
3 Pines	109		
<i>Wei Tang and Ronald J. Newton</i>			
1. Introduction	109		
2. Development of Transgenic Pines	126		
3. Future Road Map	138		
References	142		
Further Reading	150		
4 Spruce	151		
<i>Krystyna Klimaszewska, Armand Séguin, Yill-Sung Park; Jenny Arnerup and Rosario Garcia-Gil</i>			
1. Introduction	151		
2. Genetic Transformation and Transgenics of Spruce Species	156		
3. Deployment of Transgenic Trees in the Context of Multivarietal Forestry and Biosafety Issues	161		
References	164		
Further Reading	167		
5 Chestnut	169		
<i>Charles A. Maynard, William A. Powell, Linda D. Polin-McGuigan, Ana M. Viéitez, Antonio Ballester, Elena Corredoira, Scott A. Merkle and Gisele M. Andrade</i>			
1. Introduction	169		
2. Development of Transgenic Chestnuts	174		

3. Future Road Map	183	2. Development of Transgenic Walnuts	267
Acknowledgments	187	3. Future Road Map	271
References	187	References	274
Further Reading	192		
6 Birches	193	10 Casuarinaceae	279
<i>Juha Lemmetyinen, Pia Järvinen, Hanna-Leena Pasonen, Kaija Keinonen, Mika Länmenpää and Markku Keinänen</i>		<i>Diaga Diouf, Mame-Ourèye Sy, Hassen Gherbi, Didier Bogusz and Claudine Franche</i>	
1. Introduction	193	1. Introduction	279
2. Development of Transgenic Birches	197	2. Genetic Transformation	282
3. Future Road Map	210	3. Future Road Map	288
References	213	References	289
7 Douglas Fir	219	11 Black Locust	293
<i>Santosh Misra, Mariana A. Vetrici and John N. Owens</i>		<i>Isabel Arrillaga, Juan Segura and Scott A. Merkle</i>	
1. Introduction	219	1. Introduction	293
2. Development of Transgenic Douglas Fir	232	2. Review on Transgenics Developed	297
3. Future Road Map	235	3. Future Road Map	303
References	238	References	305
Further Reading	240	12 Sandalwood	309
8 American Elm	241	<i>Christopher G. Jones and Julie A. Plummer</i>	
<i>Andrew E. Newhouse, Nicholas S. Kaczmar, Charles A. Maynard and William A. Powell</i>		1. Introduction	309
1. Introduction	241	2. Transgenics Deployed so Far and Potential Options for the Future	313
2. Development of Transgenic Elm	246	3. Future Road Map	316
3. Future Road Map	254	References	318
References	256	13 Teak	321
9 Black Walnut	263	<i>Emilio Mendoza-de Gyves and Eddo Rugini</i>	
<i>Charles H. Michler, Paula M. Pijut, Richard Meilan, Gurpreet Smagh, Xiaoyu Liang and Keith E. Woeste</i>		1. Introduction	321
1. Introduction	263	2. Development of Transgenic Teaks	330
		3. Future Road Map	332
		References	337
		Index	341
